

# Dementia Clinical Network

Rupert McShane

## Today's purpose

- The theme IS variation
- Could this sort of thing be part of my job plan?
  - I have an idea.....
  - I like trying things out
  - I want that for my team
  - Moved by a patient's experience
- Enjoy

## Aims of AHSN

- Innovation Adoption
- Reducing unwarranted variation
- Levering the NHS's earning power
  
- Continuous Learning
- Engagement with patient experience
- Promoting sustainability

## People - so far

- Rupert McShane – Oxford Health
- Jacqui Hussey – Berkshire Healthcare
- Brian Murray – Oxford Health (Bucks)
  
- Jane Parkinson – Manager
- Phil Coales – former intern
- Maureen Cundell – memory clinic nurse, OH staff governor, secondment

# Project funding

- Directly: AHSN Dementia Network budget
- Levering in other AHSN funding
- Hosting projects funded from elsewhere

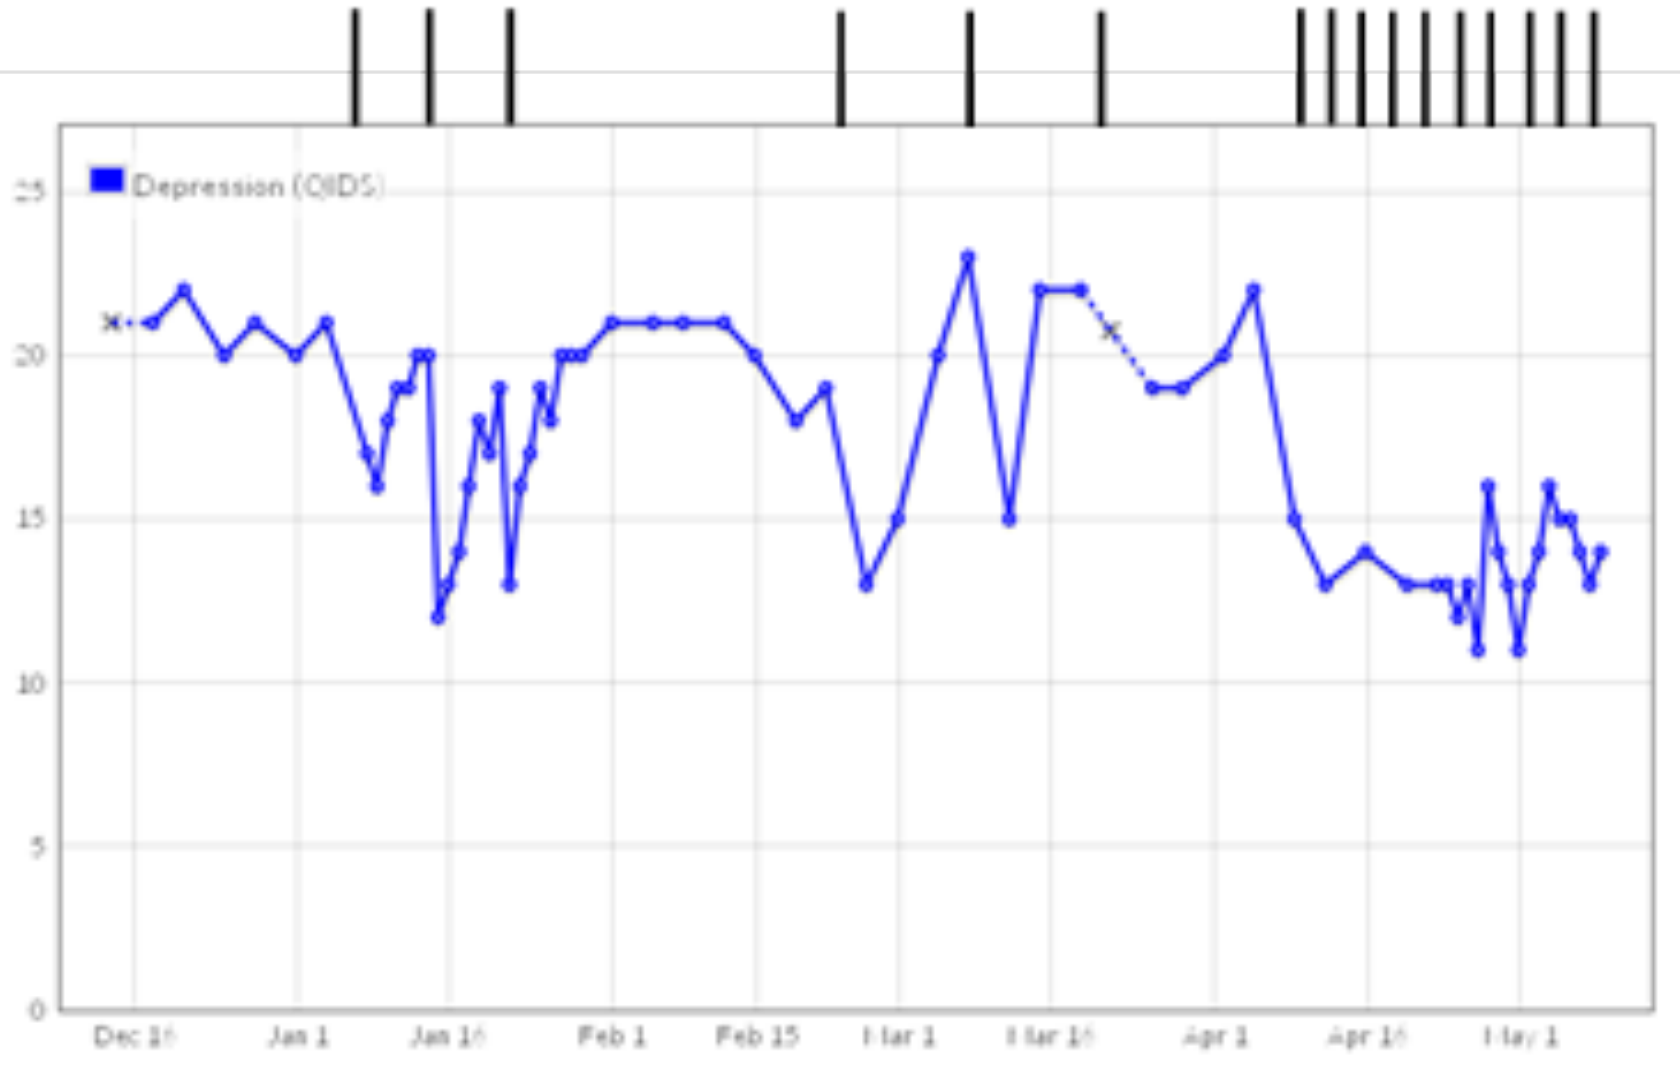

## Range of projects

- Services
- Devices
- Foods
- Collaboration
- IT and informatics

## Directly funded projects

- Neighbourhood Return
- Webinars
  - Wednesdays 12:30
  - Boundary between MCI and dementia: vignettes
  - When to stop ChEIs /statins in care homes
- Palatability of DeltaG
- True Colours

# True Colours for treatment monitoring

## Platform for info from carers

- Regular data collection by SMS/email
- Get the data back into the clinical record
  - Link to Personal Health Record (eg Health Vault)
- What questions to ask in pilot?
  - Resource Utilisation
  - Shared decision making (CollaboRATE) – variation?
  - QOL (5 item DEMQOL)
  - The research ‘ask’
- Potential as platform for cohort RCTs

## Pipeline projects

- Young people with dementia
- eSilverbook
- Proteus – chipped pills
  
- Advanced dementia course (Tier 3)
- MOOC Massive Open Online Course
- Interns
- Driverless cars

5 December 2013 Last updated at 12:07

# UK government paves way for driverless cars

Milton Keynes will introduce driverless pods

**The government has announced that it wants to make the UK a world centre for the development of driverless cars.**

It said it would conduct a review next year to ensure that the legislative and regulatory framework is in place for such vehicles to be incorporated on Britain's roads.

It will also create a £10m prize to fund a town or city to become a testing ground for autonomous vehicles.

Milton Keynes is already experimenting with driverless pods.

## Basingstoke'

...stoke" after the BBC alerted Google to the error
