

Atrial Fibrillation Counselling Support Tool

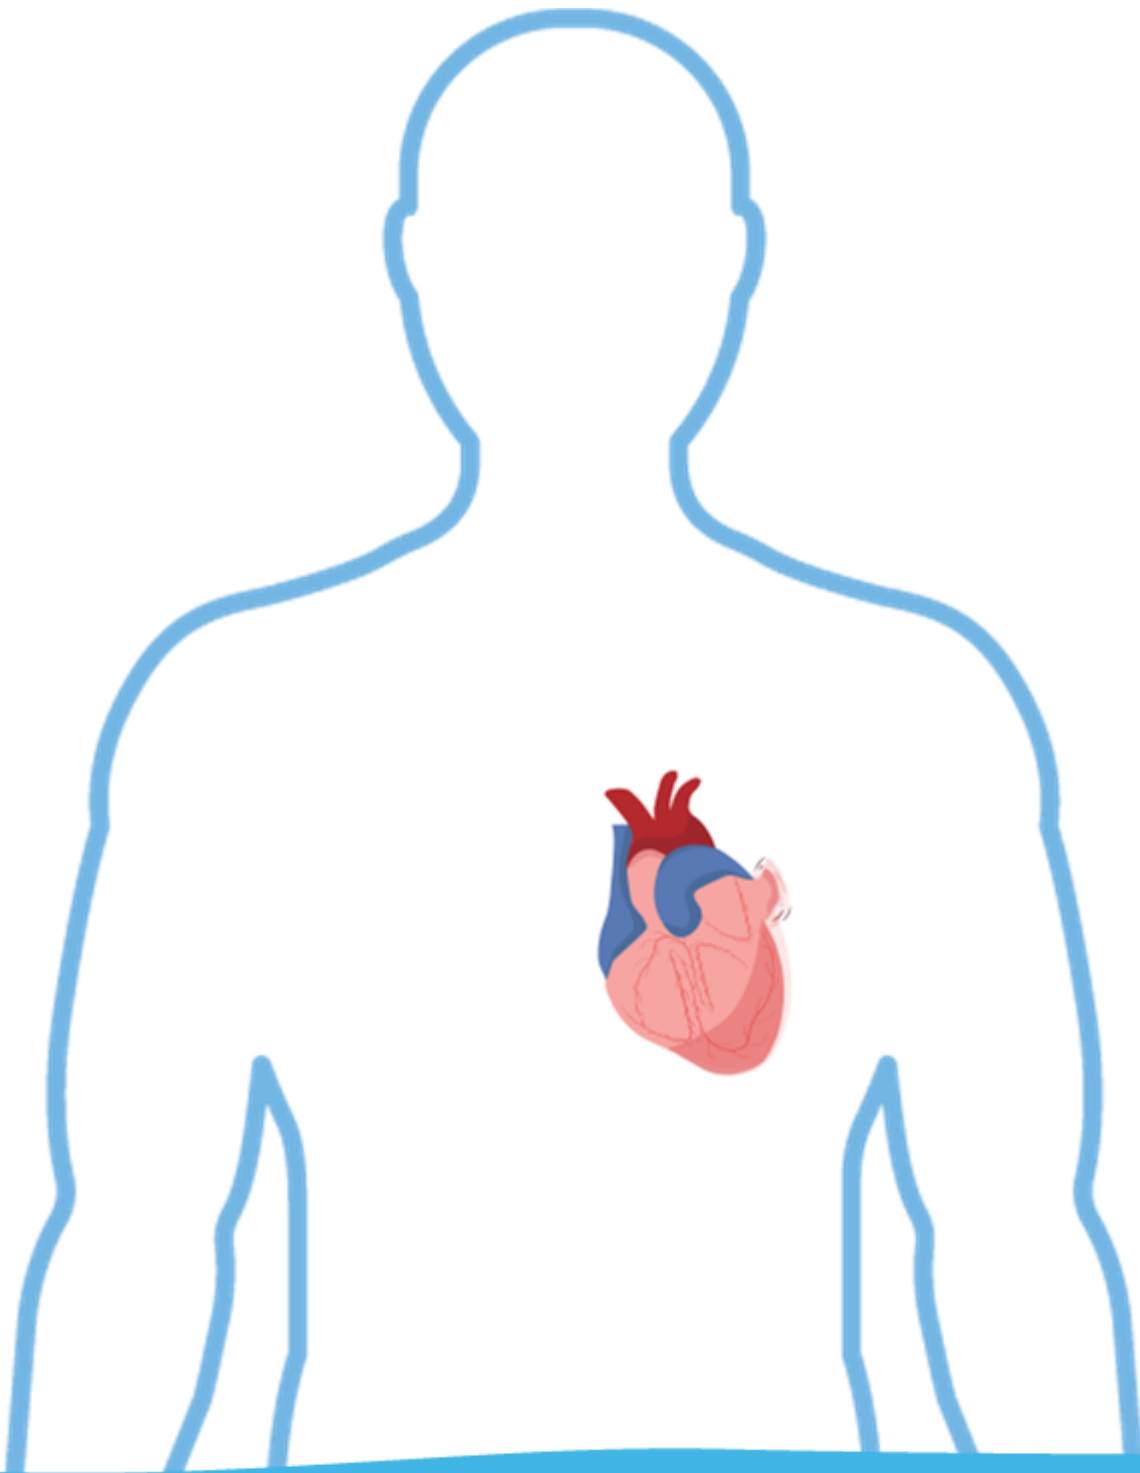

Apixaban 5mg

Your new tablet is
Apixaban 5mg

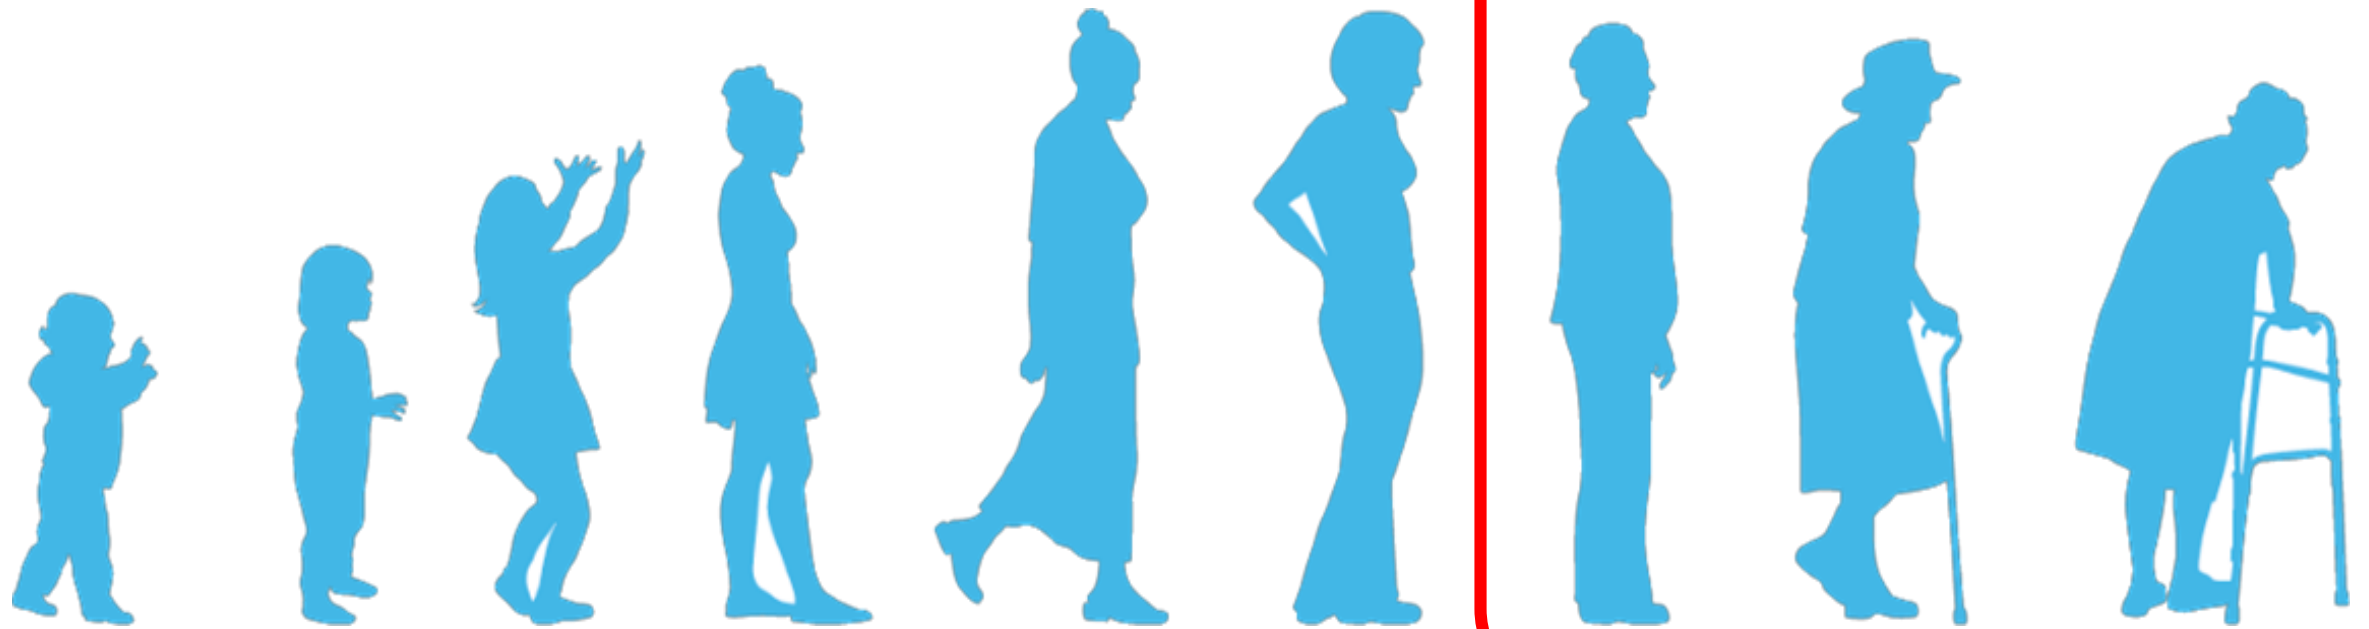

The brand name is
Eliquis

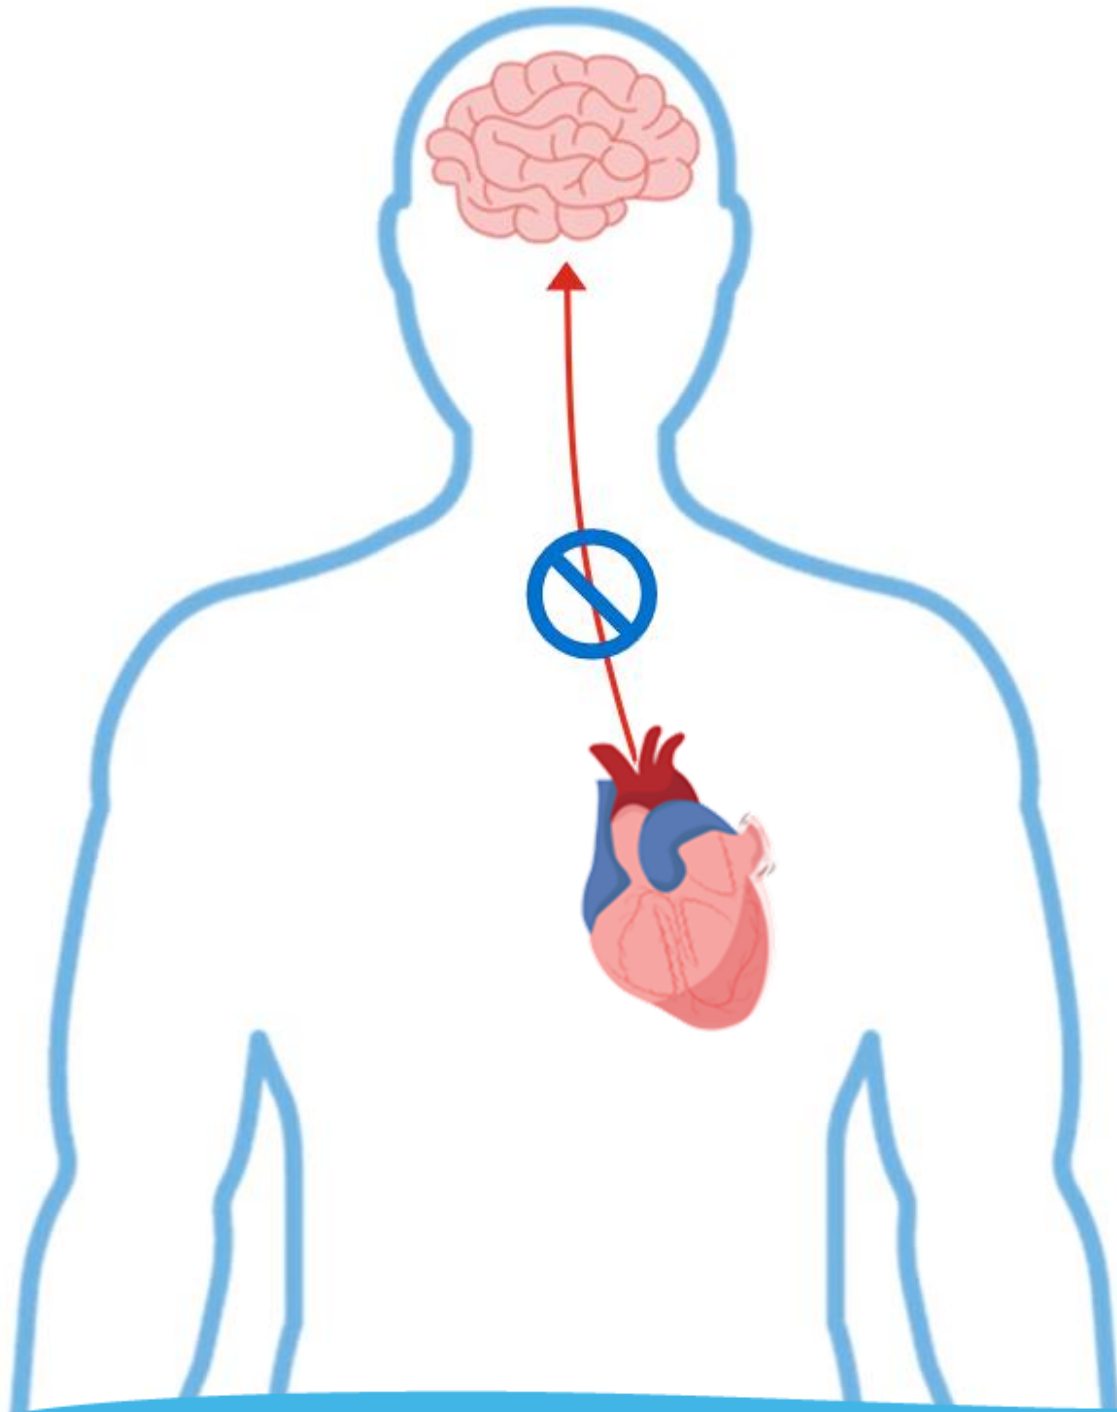

You have been
prescribed
Apixaban 5mg
because you have
Atrial Fibrillation
- a type of irregular
heartbeat

Atrial fibrillation is a major cause of stroke, particularly in older people

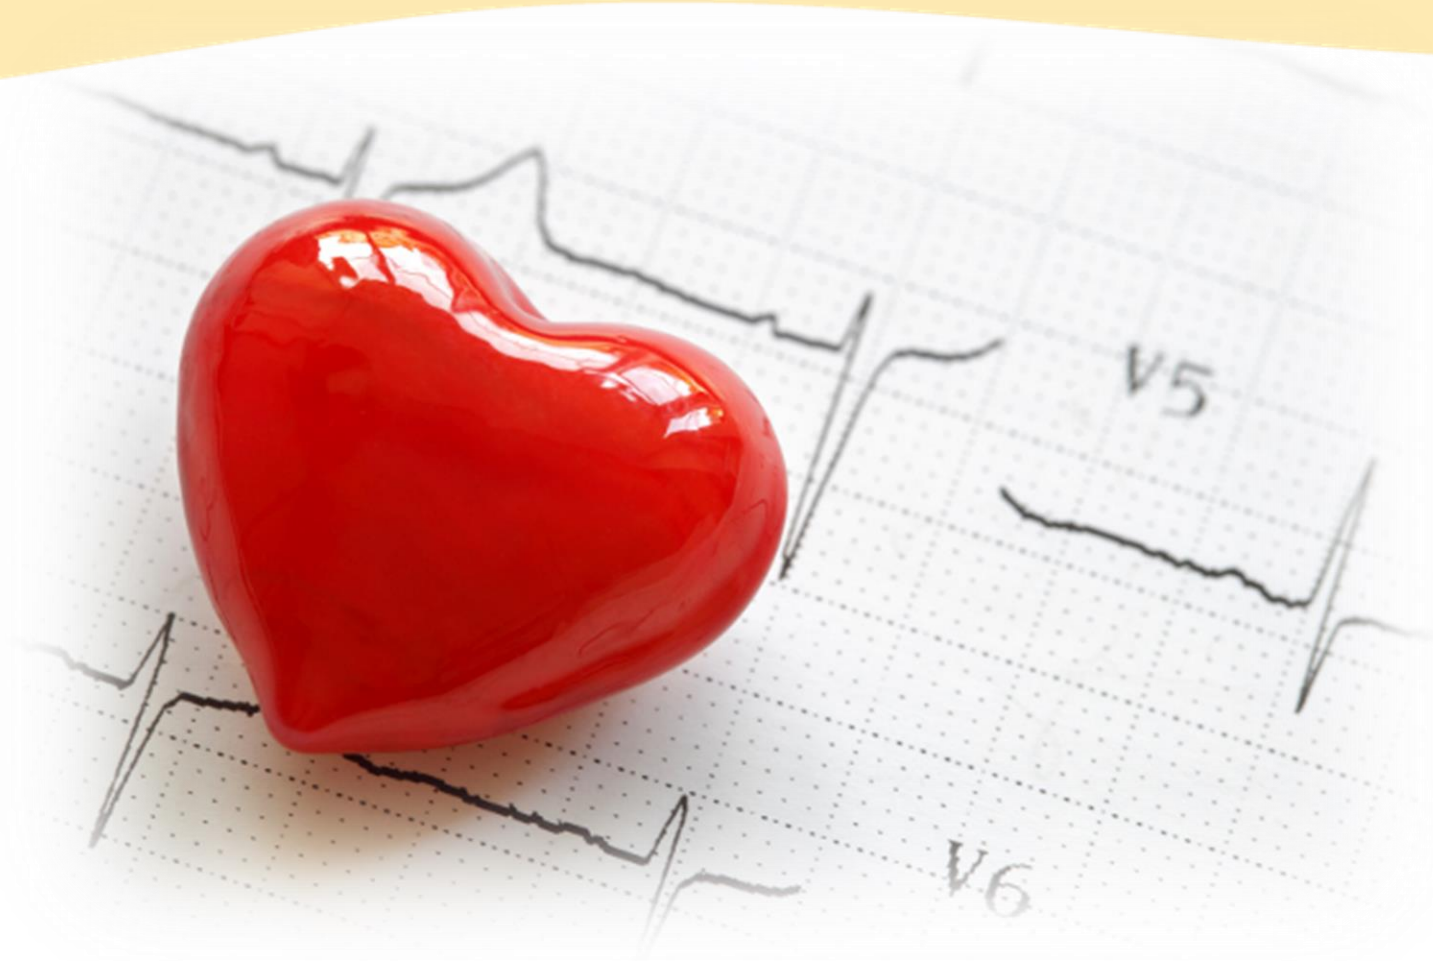

**Atrial fibrillation can
cause blood clots**

**Blood clots can
travel to the brain
and cause a stroke**

**Apixaban stops
most strokes
caused by atrial
fibrillation**

**Most people will take Apixaban
for the rest of their lives**

**Your GP will do a
blood test a few
times a year**

**This is less often
than with Warfarin**

**Take Apixaban
twice a day**

**With OR
without food**

Never miss tablets

When will you take **your** Apixaban?

Apixaban is short
lived in the body

Do not miss
any tablets

**Apixaban makes
it take longer to
stop bleeding**

If you notice any bleeding
when you use the toilet or if
your poo looks black (tarry)
tell your doctor the same day

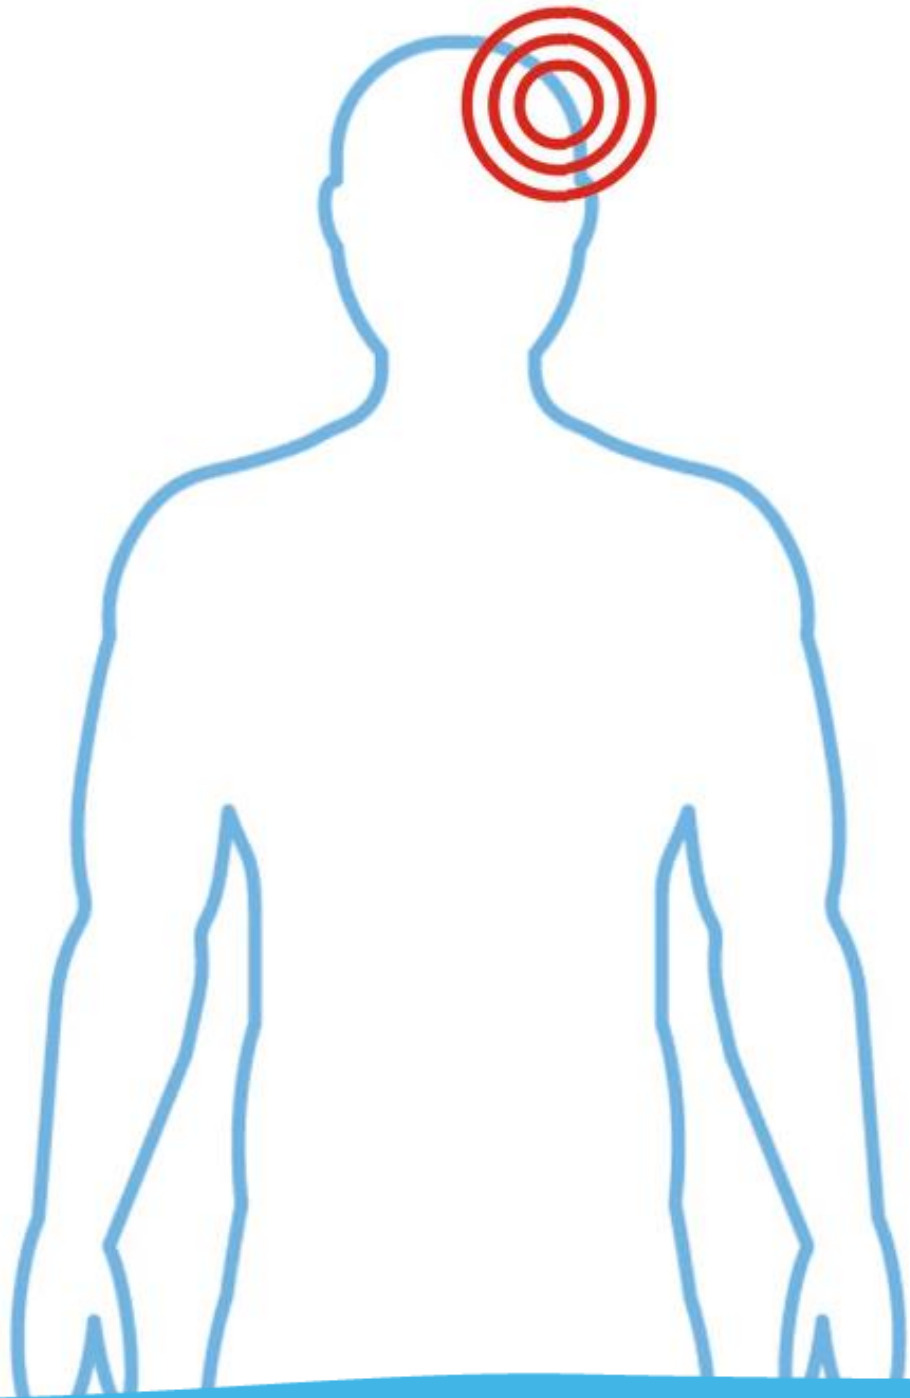

If you have lots of bleeding
seek immediate medical help

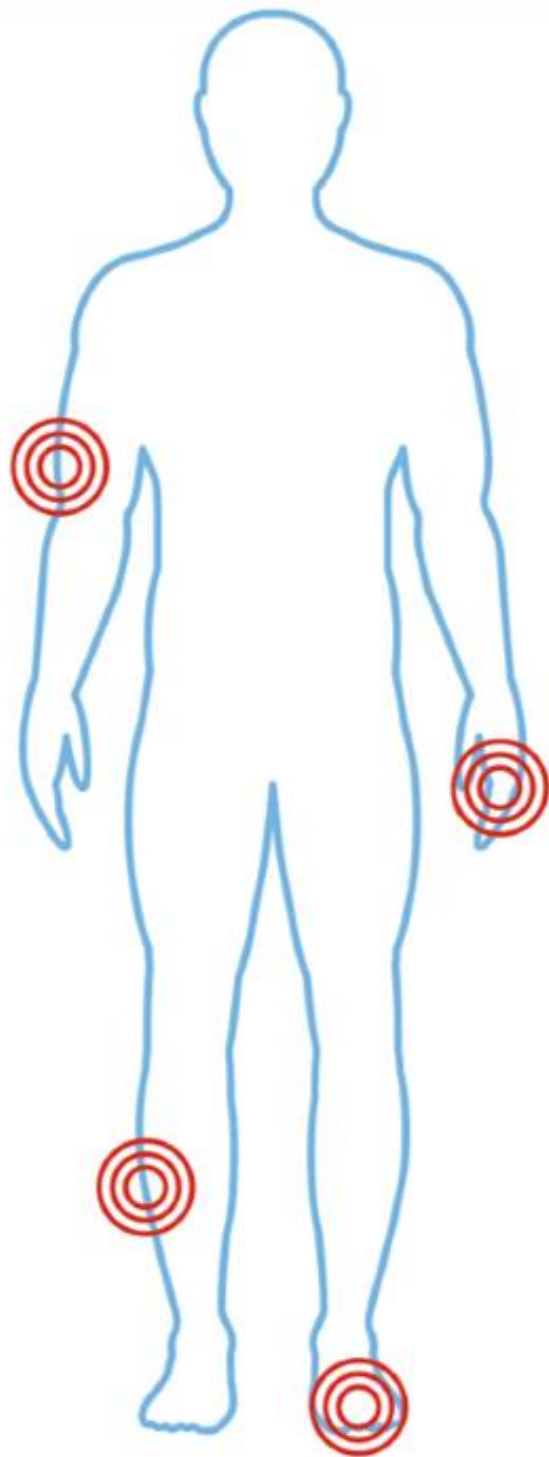

If you are bleeding badly and it doesn't stop, seek immediate medical help.

Explain that you are taking Apixaban

If you hit your head badly seek immediate medical help so that you can be checked for internal bleeding.

Explain that you are taking Apixaban

If you hit any part of your body badly, seek immediate medical help so that you can be checked for internal bleeding

Explain that you are taking Apixaban
