Early Lives, Equal Start:
Working together to improve health inequalities

Grainger, C, Kelly, R, Davy, A, Latchman, M, Fernandes, A, Quammie, E, Wale, M, Okihi, C, Akinyomoba, S, and Oxford Maternity and neonatal Partnership (OMNP), 2023 8th

Local Maternity & Neonatal System

OMNP | Maternity and Neonatal Partnership

Context

MBRRACE (2023) continues to show stark inequalities in maternity outcomes especially those women and birthing people from ethnic groups and those living in deprivation.

Not all "Dreaming Spires".

17 areas ranked within 20% most deprived in England - mostly within 30 wards - 1 in Aylesbury, 3 in Banbury & 6 Oxford.

Areas of greatest ethnic diversity located in most deprived wards e.g. Blackbird Leys.

Rise in number of asylum-seeking women & resettled refugees - new dispersal accommodation in Banbury, Oxford and Bletchley, re-settlement programmes.

Segregated maternity support, Saplings, Lotus team, Oxford Rose (Dame) (TfGM, HSE)

What is Early Lives, Equal Start (ELES):

"Early Lives Equal Start" launched late 2022, in response to local and national research. In 2021, Omotunde Coker, a community researcher with Healthwatch, collaborated with mothers from Oxford's Black and ethnic minority communities and Oxford Community Action (OCA) to create a film discussing their views on maternity care.

Working within the current system:
"The model is predicated on people coming to us, not us to them"
Based on numbers not need
Resource constraints
Barriers to staff engagement
Silo-ed approaches

Are there other/better ways of working? What can we learn from elsewhere?

Neighbourhoods can be primary units of change and critical starting points for efforts to improve health inequalities. Early Lives Equal Start is place-based working in action; improving the way organisations work together and with families, to shift attitudes and resources towards preventing problems that can start in early life.

Why OX4?
One of most deprived areas in OX4 and home to our most ethnically diverse community. Community Midwifery services already located in OX4, Flos at the Park. Flos- a social enterprise at heart of OX4 community life.

Currently Funded by BOB LMNS & BOB ICB HiEP.

Aim:
To support mothers and birthing people from the diverse migrant population of OX4, who are at greater risk of adverse outcomes to thrive in pregnancy and early parenthood.

Specific objectives:
Better Access, Experience and Outcomes for women and birthing people in OX4
Co-produced targeted and effective community based antenatal education and support for minoritized communities in OX4
Coordinated place based social prescribing with an anti-poverty, legal literacy lens

What do we do?

Place-based co-produced innovation which builds on existing partnerships, relationships & networks.

Maternity Advocates and Community Organisers (MACOs):
Maternity Health Justice partnership in action
Referral pathway to MACO team created
Worked with over 100 families (Jan 23 to present)

Antenatal classes
Co-produce community-based antenatal education and culturally-appropriate health literacy information with relevant interpretation

Training in community outreach, peer-to-peer support and advocacy
Advocacy and empowerment (ESMAs - Equal Start Maternity Advocates) - stories for change

Peer to peer support (ESCOs - Equal Start Community Outreach)

Done by community, for community...

"When we do change to people they experience it as violence; when people do change to themselves, they experience it as liberation"

Rosabeth Moss Kanter

Login model Early Lives Equal Start Process -

The diagram illustrates the Login model Early Lives Equal Start Process. It shows a flow from 'Initial Assessment' through 'Referrals' and 'Interventions' to 'Evaluation' and 'Feedback'. A feedback loop leads back to 'Initial Assessment'. The process involves various partners: Local Health Board, NHS Foundation Trust, and Community Partners. A legend indicates symbols for Local Health Board, NHS Foundation Trust, and Community Partners. A note states: 'Community partners, individuals, and organisations involved in change and improvement are key to the success of this project. Their input and involvement are essential for our work, requiring engagement and recognition across the system.'

What has been achieved to date:

One year on.

- Improved access & experience for pregnant women in OX4:
 - Including obstetric outreach clinic for Timorese women and birthing people
 - Social prescribing with an anti-poverty, legal literacy lens (Maternity Advocate and Community Organiser (MACO) casework)
- Continue to Co-produce community based antenatal education and support
- New maternity advocates peer support network
- Shared Learning Event March 8th for International Womens Day

Launch of the Equal Start Maternity Advocates programme
